

Dallas – Fort Worth Hosta Society 2011

We are starting a new society in The Dallas - Fort Worth area.

If you are interested in joining this society, please contact us!

There are many beautiful gardens in this area and many wonderful gardeners. This is a great way to introduce the many varieties to all of us and learn all about them and how to grow them best in our region. There is nothing like the camaraderie of a club to get gardeners together. Just contact us and we'll get a meeting scheduled and the fun will begin.

They are incredibly easy to grow, and hostas improve with age. There is something magically addictive about growing hostas. It is the "Friendship Plant" (a phrase coined by the late Herb Benedict), bringing people together to form new and lasting relationships ...

Hostas are Forever!
